### Beyond The Buttons: How to Use AI Creatively Friday February 27, 2026 7:30 (eastern time)

#### Topic

**Beyond the Buttons:** is about how to use AI creatively, specifically for the working and exhibiting photographer. There will be little mention of the top technical tools that are creating images. The major focus will be on how to use AI as an assistant to research and produce conversations that inspire and streamline the creative process, opening your time up to do things that only you can do. I will include a number of examples of how I use it and how to write prompts that will absolutely help your business and fine art process.
